(including Management Discussion & Analysis)

Dear Members.

Your Directors present the 43rd Annual Report on the business and operations of **Kinetic Engineering Limited** and the Audited Financial Accounts for the financial year ended 31st March, 2014.

Financial Highlights

During the financial year 2013-14, the Total Revenue was Rs. 61 Crores as against Rs. 87 Crores in previous year. The revenue of the Company was lower due to prevailing recession in the Automobile Industry and reduction in demand from main customers of the Company Mahindra Two Wheelers Limited & Tata Motors Limited. The net loss during the year was Rs. 59 Crores.

Major factors contributing to net loss were as under: -

- The operating net loss of the Company was Rs. 26.39 Crores.
- 2. In order to meet liabilities in the year 2013-14 the Company had to liquidate its non-core assets i.e. investment in equity shares of Mahindra Two Wheelers Limited at a loss of Rs. 24.77 Crores.
- 3. Due to adverse foreign currency movement the Company made provision of Rs. 3.90 Crores towards exchange fluctuation loss.

The financial performance of the Company was also affected by overall uncertain macro-economic environment and recessionary economy.

Business Overview

During the year, your Company has initiated three prestigious programmes;

- 1. Your Company has bagged an order from Aixam Polaris, a Company from France to manufacture complete Gear box for their Side-By-Side / ATV (All Terrain Vehicles) Vehicles which has a high volume business and is a leading market player.
- 2. Your Company also bagged an order from American Axle, to manufacture machine / part name 'Yoke' for its units in Mexico and India. To complete this order, your Company has installed an in house forging press to expedite the manufacturing process and to reduce material cost.
- 3. Your Company also bagged an order to manufacture Oil Pumps parts from Advik, Chakan, Maharashtra.
- 4. Development of complete Gear box for Piaggio Vehicles Private Limited (PVPL) LCVs having 40 kilogram weight with the torque of 150 NM. This LCV is soon to be launched. With the launch of this LCV, PVPL is expected to perform very well in the market.
- 5. Your Company has also got an LOI for Tata Nano's Automatic Manual Transmission (AMT), diesel and CNG version car.
- 6. To reduce material costs and better control of inventory schedules of customers, your Company has installed one ton hammer in forging shop, so as to become self reliant in forging supply and thereby managed to gain better control and reduction in costs of raw materials by at least 5% 6%.

To summarise, the year under review has seen a good progress in the development of new programmes continued from last year and it gives confidence to your Directors that the Company would continue to see revenue increase from existing programmes, though this year the revenues did not show increase due to fluctuating market conditions for major product lines and overall depressed Automotive sector in India.

Many new programmes have been under development and testing during 2013-14 and they are now nearing completion. Being large and complex programmes, company expects them to start in the coming financial year and gain momentum within the first few quarters of the year, to be productionised during 2014-15, Further, the Company continues to add more parts from its existing customers including Mahindra and Mahindra, Carraro, Tata Motors as well as is exploring aggressively export business once the new programmes are in full production and based on projections given by our customers, company is confident of further increasing its revenues.

With a quality system set up in tune with the requirements of ISO 9001, and with ISO/TS 16949:2002 certification, the Company plans to leverage its skills in domestic as well as international market, by further striving for total customer satisfaction through relationship building and providing superior products and technological solutions to its customers. In the coming years, the Company will focus on strengthening its technological base and customer relationships to establish its position as a leading Power train components and assemblies specialist. Your Company would also like to adopt best manufacturing practices and has already started practising an internal Quality initiative called "KQAA" (Kinetic Quality Assessment and Awards") which reviews and rewards exceptional practices in Quality at each cell.

Industry Overview

Global Economic Slowdown affected growth of Indian Economy. Also due to Changing of economic and business conditions, evolving consumer preferences, rapid technological innovation and adoption and globalization are creating an increasingly competitive market environment that is driving corporations to transform the manner in which they operate.

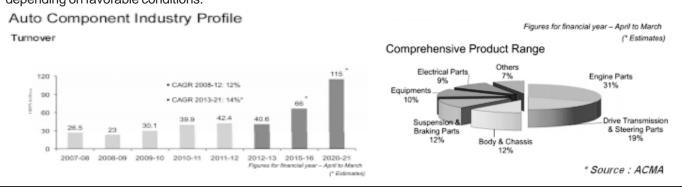

The domestic market continued to be challenging for the automotive industry and for the year witnessed a distinct slowdown/negative growth. The demand was restrained by higher interest rates, inflation, fuel prices, volatile commodity market, industrial unrest and adverse forex fluctuations. Investor and business confidence was low throughout the year.

With the new Government at the center having clear majority, focusing on policy decisions, inflation control and commitment towards industrial and infrastructure development, customer sentiments are expected to improve in the country in medium to long term and stimulate the demand for the Auto industry.

In spite of some current concerns, the growth forecast for the Indian economy remains healthy. With the resulting increase in income levels and lifestyle aspirations, the potential size of the Indian passenger vehicle market in the next five years is likely to be as large as 4-5 million vehicles with a conservative growth rate of 10-12% per year. Similarly, the growth in agriculture and industrial production, the spread of organised retail and the growing prevalence of the huband-spoke model for transportation of goods will lead to a significant expansion of the overall market size. The expected introduction of more stringent norms related to overloading of goods vehicles and roadworthiness and vehicle age will also lead to considerable expansion in the market for CVs.

The Indian auto component industry is one of the country's rising industries with tremendous growth prospects. From a low-key supplier providing components exclusively to the domestic market. The industry has emerged as one of the key auto components centres in Asia and is today seen as a significant player in the global automotive supply chain.

As per an Automotive Component Manufacturers Association of India (ACMA) report, the turnover of the auto component industry was measured about US\$ 66 billion in FY 2015-16 with the likelihood to touch US\$ 115 billion by FY 2020-21 depending on favorable conditions.

As evident from the above graphical chart, engine parts and transmission and steering parts have 50% of market presence in overall automotive products range in the automobile market. Your company's main line of business is also in engine parts and transmission systems and there is huge potential for still growing its business and utilise untapped potential and thereby solicit big customers having sizable market presence in the two wheeler, three wheeler and four wheeler vehicles segments.

OPPORTUNITIES AND FUTURE OUTLOOK

We expect demand outlook to continue to remain weak in automobile sector, primarily due to uncertain macro economic environment. But the elections have delivered a clear mandate for decisive governance and development. 2014 - 15 could be a turnaround year for India, given the new energy and political will to drive economic reforms.

The new leadership has shown a resolve to implement progressive policies to bring the economy back on track. If this resolve translates into action, three developments could take place. Stalled projects could see quick execution. Better-directed subsidies could prune the fiscal deficit. Finally, strong leadership at the helm could make the administration more streamlined and responsive.

Hopefully, these steps will quicken the pace of capital formation and improve productivity. Continued reforms and a stable monetary policy would bolster the country's macroeconomic fundamentals and deliver a powerful message of societal and economic dynamism to the world.

Your Company is focusing basically on following in the coming years:

- (1) Technical alliances with the global leader like Magna Styr India Pvt. Ltd., to get access to new technologies like that of Automated Manual Transmissions (AMT), CVTs, ATs, Transfer Cases & complete solutions related to power train products. Through the Technical Agreement Company will not only strengthen it's expertise, but add a horizontal benefit to its capabilities. The Company will also get access to various clients globally which shall open a door for numerous opportunities way ahead.
- (2) To focus on high volume business with PVPL for gears and shafts and use Company's infrastructure for PVPL's three wheeler business.
- (3) To focus on high volume business with Aixam Polaris for manufacturing complete Gear box for their Side-By-Side / ATV (All Terrain Vehicles) Vehicles.
- (4) To focus on high volume business with American Axle for manufacturing machine / part name 'Yoke' for its units in Mexico and India.
- (5) To focus on high volume business with Advik, for manufacturing Oil Pumps parts.

Thus, the outlook of your Company is promising with continuous growth in terms of value and volume.
